

Corrigendum

Volume **144**, Number 1 (1989), in the article “Some Multilinear Generating Functions for q -Hermite Polynomials,” by H. M. Srivastava and V. K. Jain, pages 147–157: Srivastava and Jain claimed to have generalized certain multilinear generating functions in [2]. They claimed that their (1.12) is markedly different from (5.15) in [2]. Srivastava and Jain seem to have overlooked the fact that their (1.12), far from being different from (5.15) in [2], actually follows from (5.15) in [2] when coefficients of like powers of t_{2k+1} on both sides of (5.15) in [2] are equated.

Some of the multilinear formulas in [2] have been extended in [1].
